

SUFFOLK CONSTABULARY

Control Room: Call Handling Data

Data Period: September 2024

999

Suffolk Police have received **9,474** 999 calls and on average answered with **6** seconds.
90.4% of these calls were answered within 10 seconds.

101

During this period, Suffolk Police have also received **18,526** calls to 101.
When dialling 101, callers are presented with a series of options. A number of these allow self-service.
21.1% of 101 calls were processed having selected a self-service option.
78.9% continued past this stage without selecting a self-service option.

Those not requiring one of the self-service options are put through to a switchboard call handler.
In this period, our switchboard received a total of **14,615** calls.
On average, the time to answer a call was **15** secs. **32.2%** of these calls were managed at this point.

The remaining **7,442** calls were joined by **1,861** Night Service calls and these continued to a control room operator following a risk assessment under the THRIVE policing model (Threat, Harm, Risk, Investigation, Vulnerability, Engagement).

Following this assessment, calls are placed into the appropriate queue as follows:

Call Type	Calls Received	Calls Answered	Average Answer
Emergency	416	407	00:00:07
Priority	2,264	2,037	00:03:04
Routine	4,527	3,941	00:02:42
Advice	246	211	00:01:49
Partners	1,276	1,242	
Other	574	472	
Total	9,303	8,310	

(Night Service Calls fall within 'Routine')

*Call groups consist of multiple priority-based queues, e.g. Priority includes calls under Domestic, Mental Health, Public Safety or those triaged as urgent.
The switchboard is not routinely open during the night. Calls received at this time continue straight to an operator if selecting the relevant option.
Calls listed under 'Partners' will also include calls accessing via routes other than 101, i.e. dedicated direct dial.*
